For Immediate Release

Elkhorn, Wisconsin – September 30, 2015

Walworth County CTH H - Public Information Meeting Announced October 14, 2015 4-6 pm at Walworth County Public Works Building

The Wisconsin Department of Transportation and Walworth County Public Works Department are planning a highway improvement project for CTH H north of Elkhorn between Voss Road and CTH A. A Public Information meeting to discuss this project will take place at the Walworth County Public Works Building located at W4097 County Road NN, Elkhorn, WI on Wednesday, October 14, 2015 from 4:00 p.m. to 6:00 p.m.

The meeting will follow an informal, open house format. Representatives from the Walworth County Department of Public Works and their design consultant Baxter & Woodman will be available to discuss the proposed project and address any questions or concerns. No formal presentation is planned.

This project is proposed to recondition the roadway pavement on County Highway H. Additionally, the improvement concepts include:

- Three intersections with severe intersection angles may be reconfigured to improve sight lines and intersection angles. The intersections include Foster Road, Sugar Creek Road, and Schmidt Road. If reconfigured, these intersections will require purchase of additional right-of-way lands.
- Closure of the Cobble Road intersection is being evaluated to improve safety.
- All roadway and driveway culvert pipes will be replaced with new culvert pipes and apron end walls.
- The twin culvert pipe installation at Sugar Creek will be reconfigured to address erosion issues and reduce maintenance needs. Options regarding this reconfiguration are being evaluated and may include headwall construction, pipe extensions, or structure replacement.
- Road closure is planned for the project with access maintained for local traffic only. The detour route would likely include USH 12 and CTH A.

Construction is currently scheduled to take place during 2017.
