## Get Active This Summer!

Physical activity is an essential component of a healthy lifestyle. In combination with healthy eating, it can help prevent a range of chronic diseases, including heart disease, cancer, and stroke, which are the three leading causes of death. Physical activity helps control weight, builds lean muscle, reduces fat, promotes strong bone, muscle and joint development, and decreases the risk of obesity. Children need 60 minutes of play with moderate to vigorous activity every day to grow up to a healthy weight.

If this sounds like a lot, consider that eight to 18 year old adolescents spend an average of 7.5 hours a day using entertainment media including TV, computers, video games, cell phones and movies in a typical day, and only one-third of high school students get the recommended levels of physical activity. For more information, check out [www.letsmove.gov](http://www.letsmove.gov)

## Where to go?

Getting outside isn't just a great way to get exercise, it's also a lot of fun! Find affordable physical activities in your area that can help bring the whole family together and start enjoying the great outdoors. Use these online resources to find local outdoor events, forests, parks, and playgrounds in your area!

## Fireworks Safety

Fireworks are an American tradition and an annual rite of passage. Fireworks, however, especially illegal ones, can also cause serious injury and easily be fatal. There are around 200 firework-related injuries a day reported in the months surrounding the Fourth of July.

To keep you and your loved ones safe this summer, make sure you only buy legal fireworks with a manufacturer's label and store them in a cool, dry place.

Light only one firework at a time, and never place any part of your body directly over a fireworks device. Back up to a safe distance immediately after lighting the fuse.

Never carry fireworks in your pocket or shoot fireworks off in glass or metal containers, and do not relight any that fail. Always keep a supply of water nearby in case of fire and douse all used fireworks with water.

### DID YOU KNOW

Sparklers can burn at 2000 degrees Fahrenheit, or as hot as a blow torch.

## Three Common Exercise Excuses and How to Beat Them

We all have our reasons for not working out, yet excuses only prevent us from being happy and healthy. Here are some of the most common excuses and ways to overcome them. Remember, no one ever regrets a workout!

**Too tired** – The first and most common reason to avoid regular exercise evaporates as soon as you push through it the first time. Multiple studies have shown regular physical activity can improve energy.

**Too busy** – Another popular excuse, it's an easy out to cite scheduling conflicts before shrugging off the gym, but according to the American Heart Association, only 75 minutes of weekly vigorous exercise is needed to improve your health.

**Not motivated** – Possibly the most difficult excuse to overcome, there are several ways to jumpstart motivation. One of the best is to post a goal using social media. No one likes falling short in front of others, so commit publicly to hold yourself accountable.

## Summer Savings Tips

You can save money throughout the year, but the warm temperatures of summer provide a few additional benefits from the long, warm days, as well as challenges that come from staying cool. Here are some solar-powered savings tips sure to help your bank balance.

1. Turn off the air conditioner – Obviously, your air conditioner is no good to you if you never use it, but try to pattern AC use around the weather and time of day. For those times when it's breezy or simply warm, a fan and open windows work just as well and for far less money.
2. Replace air conditioner filters – Dirty filters restrict airflow and can cause the system to run longer, increasing energy usage. Experts recommend changing your filters every 30 to 60 days or more frequently if you have pets or allergies.
3. Take advantage of long daylight hours – One of the best benefits of the long summer days is reducing the need for lighting in your home.
4. Cook outside – Using a stove or oven can create excess heat inside your house. Grilling is one of the best ways to take advantage of the outdoors when the weather is nice—and keeps your indoors cool
5. Let laundry dry outside.
6. Plan ahead for future projects – The end of summer is one of the best times of year for big discounts on home and garden materials.

## Baked Fish and Vegetables

While grilling is ideal for summer weather, this baked entrée is one of the healthiest and simplest recipes around, enabling you to spend more time at the beach, while looking great, too.

4 white fish filets (fresh or frozen, total of 16 to 20 oz.)  
16 oz. mixed vegetables (frozen)  
1 small onion (diced)  
1 tsp. lemon juice (or fresh lemon, sliced thin)  
1 tbsp. parsley flakes (dried or freshly chopped)  
4 10x12 in. sheets of aluminum foil

Preheat oven to 450 degrees. Separate and place fish filets in center of each tin foil square. Combine frozen vegetables and diced onion in a bowl and mix. Spoon vegetables around filets. Sprinkle with lemon juice (or top with lemon slice) and add parsley on top. Fold and bake for 10 minutes.

Yield: 4 servings. Each serving provides 360 calories, 12g total fat, 2g saturated fat, 120mg cholesterol and 130mg sodium.
